

# UNIONS MAKE WORK SAFE

## WORKERS MEMORIAL DAY

# 28 APRIL

### **What is Workers Memorial Day?**

**On April 28, we stop work to take a moment to remember workers killed and injured because of their work.**

**Everyone expects to come home safe at the end of the day, but:**

- 50-70 workers are killed at work, and 750 -900 die as a result of work-related health.
- That equates to 18 workers being killed every week because of their work.
- Every 15 minutes a worker suffers an injury that requires more than week away from work.

*A moments silence commemorates those workers and their whānau impacted by work*
